Your Introduction to Chiropractic First Family Wellness Center

We would like to explain how our unique approach works and why we might be able to help you. We believe all health problems have three causes.

The **first** cause of health problems is poor nutrition and chemicals in our water, food and air. The US rates 36th in life expectancy but is #1 in obesity, diabetes and other chronic diseases. There are 82,000 chemicals that can enter your body weekly. To defend against them your body surrounds them in fat. We help our patients remove these harmful chemicals while improving their nutrition and balancing their biochemistry.

The **second** cause of health problems is hormone imbalances from stress. Prolonged stress leads to hormone imbalances related to the stress glands of the body known as the adrenal glands. These glands secrete hormones that control sleep, digestion, weight gain, estrogen, progesterone, testosterone, allergies, arthritis, immunity, heart function, fatigue, etc. These glands can be checked and if malfunctioning, they can be repaired through diet and supplements.

The **third** cause of health problems is undetected neurological damage from traumas related to their symptoms. We can have falls and accidents that occurred in the past, which can cause undetected and long-lasting damage not just to muscles, but also to nerves as well. Nerves control all function in the body, and if they are not working properly, neither will your body. Headaches, shoulder, back or neck pain as well as numbness usually come from undetected nerve damage.

Your attitude about your health is as important as the specific reason you've consulted our office. Below you will find four prevalent health attitudes. Please mark the one that most closely reflects your personal values.

___ **Treatment only.** I only consult a doctor when I have an ache or a pain and discontinue care as soon as it has cleared up.

___ **Prevention.** In addition to symptomatic treatment, I consult specialists occasionally to prevent problems from recurring.

___ **Maintaining health.** I am conscious about my health, diet, exercise, etc. and actively pursue these because I feel better, perform better and it maximizes my potential.

___ **Family health.** I take an active part in assisting, informing, and maintaining health with my family. I'm concerned with the long-range affects of good health.
